Dipartimento
di Eccellenza
2018-2022

I principi dell'Economia Circolare

Restorative by design

Mantenere in circolo i prodotti e i materiali il più a lungo possibile

Eliminare rifiuti ed inquinamento

Rigenerare il sistema naturale

Economia circolare: Non è ...

- Una **moda** (in realtà esiste da secoli)
- Una questione solo legata ai **rifiuti**
 - Oltre al riciclo e recupero, riuso, riparazione, rifabbricazione, ecodesign
- Una opportunità solo per le Grandi Imprese
 - le esperienze di **maggior successo** sono spesso realizzate dalle **PMI**!

Economia circolare e creazione di valore: l'approccio dei modelli di business

Slowing

- estendere la vita del prodotto

Closing

- riciclare

Narrowing

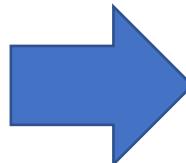

- usare meno risorse per prodotto

Intensifying

- intensificare l'uso del prodotto

Dematerializing

- rendere il prodotto un servizio

Riduzione
dei costi

Nuovi fonti
di ricavo

I modelli di business circolari

CIRCULAR INPUT

The use of **renewable energy** and material **inputs that are renewable, recyclable or biodegradable** in consecutive lifecycles

PAY PER USE

Instead of selling the product, the **company keeps ownership** of the asset, thus designing the product for longevity and selling the corresponding service

SHARING

Promotion of **collaboration platforms** putting in contact asset owners and users, enabling consumers to achieve savings but also gain profits from a shared thus optimized use of the asset

LIFE CYCLE EXTENSION

The company design and manufacturing processes are aimed at extending the product's life, the value is maintained and improved through **reparation, upgrading, remanufacturing or upcycling**

END OF LIFE

Set up of production and consumption systems where what was previously considered as waste is instead recovered, recycled or regenerated to be reused as inputs for new processes

Rifo'

- Azienda del settore dell'abbigliamento nata nel 2017 con l'obiettivo di realizzare capi in fibre rigenerate e rigenerabili

ACBC

ANYTHING CAN BE CHANGED

Sneakers realizzate con materiali riciclati, bio-based, animal-free e dall'impatto ambientale sensibilmente ridotto

UN ARMADIO INFINITO PER TE

Noleggia abiti, scarpe e borse, componi il tuo outfit da sogno per la tua occasione speciale.

BLUE OF A KIND

(re)made in italy

anastasia short - upcycled garment

apollo carrot jean unisex - upcycled garment €479.00

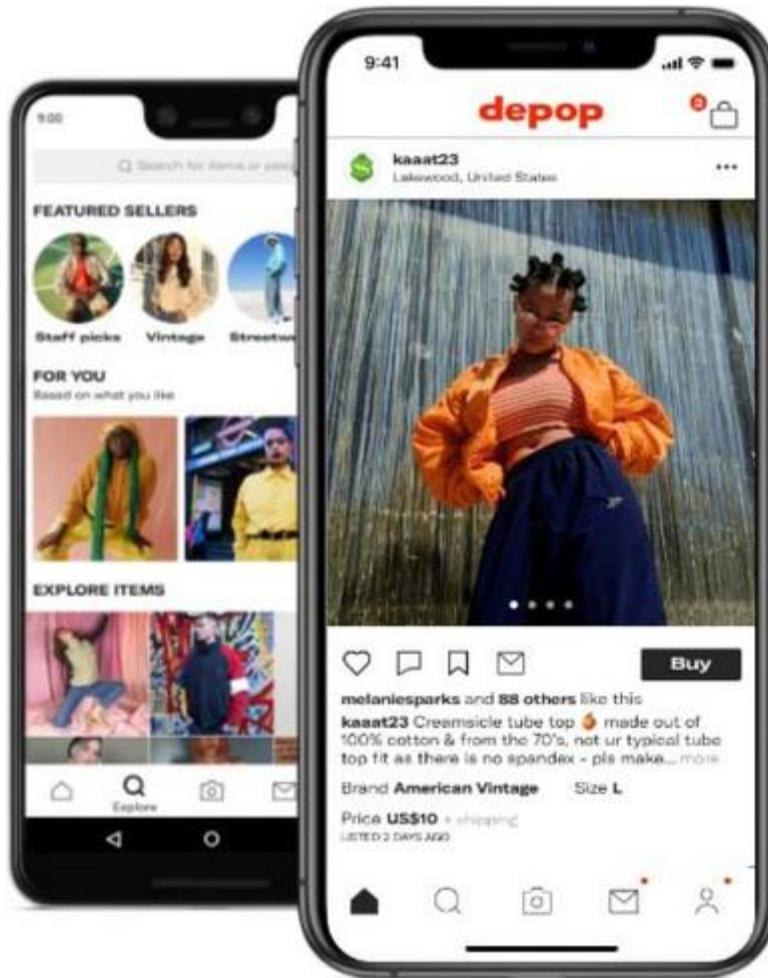

benni bucket hat - upcycled garment

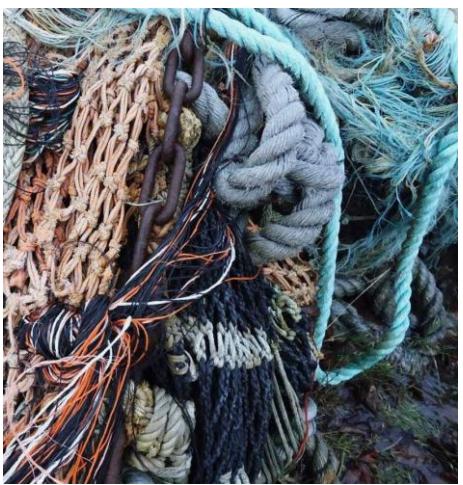

€99.00

Depop

App per vendere capi usati, sviluppata nell'incubatore H-Farm

ECONYL®

Aquafil has been able to develop an industrial process to get back **nylon from fishnet and from carpets**

 **ORANGE FIBER**

Produzione di tessuti da rifiuti industriali agrumicoli

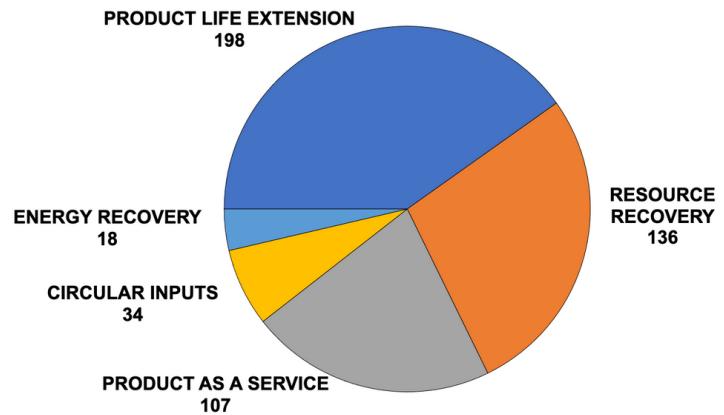

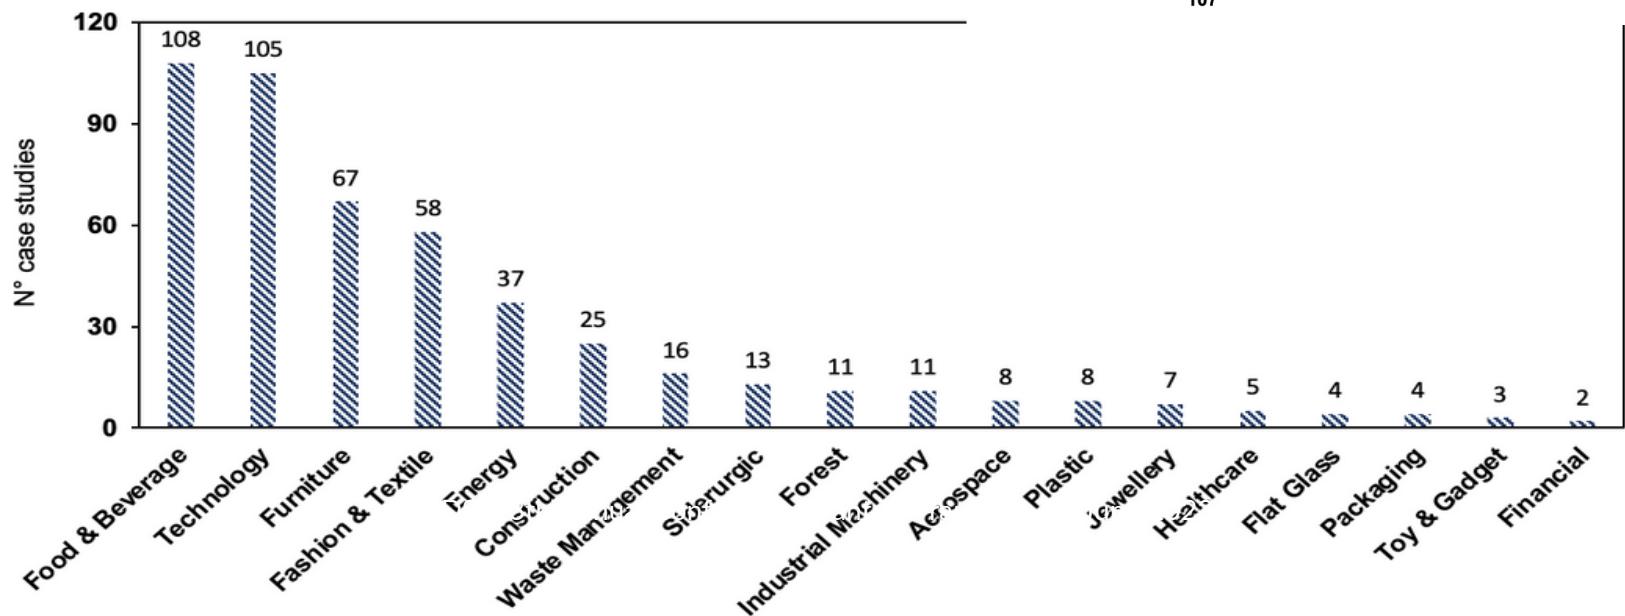

PIGMENTO

Recupero scarti agricoli e alimentari
Trasformazione in polvere e liquidi per tessile, bioedilizia, alimentare e cosmetic

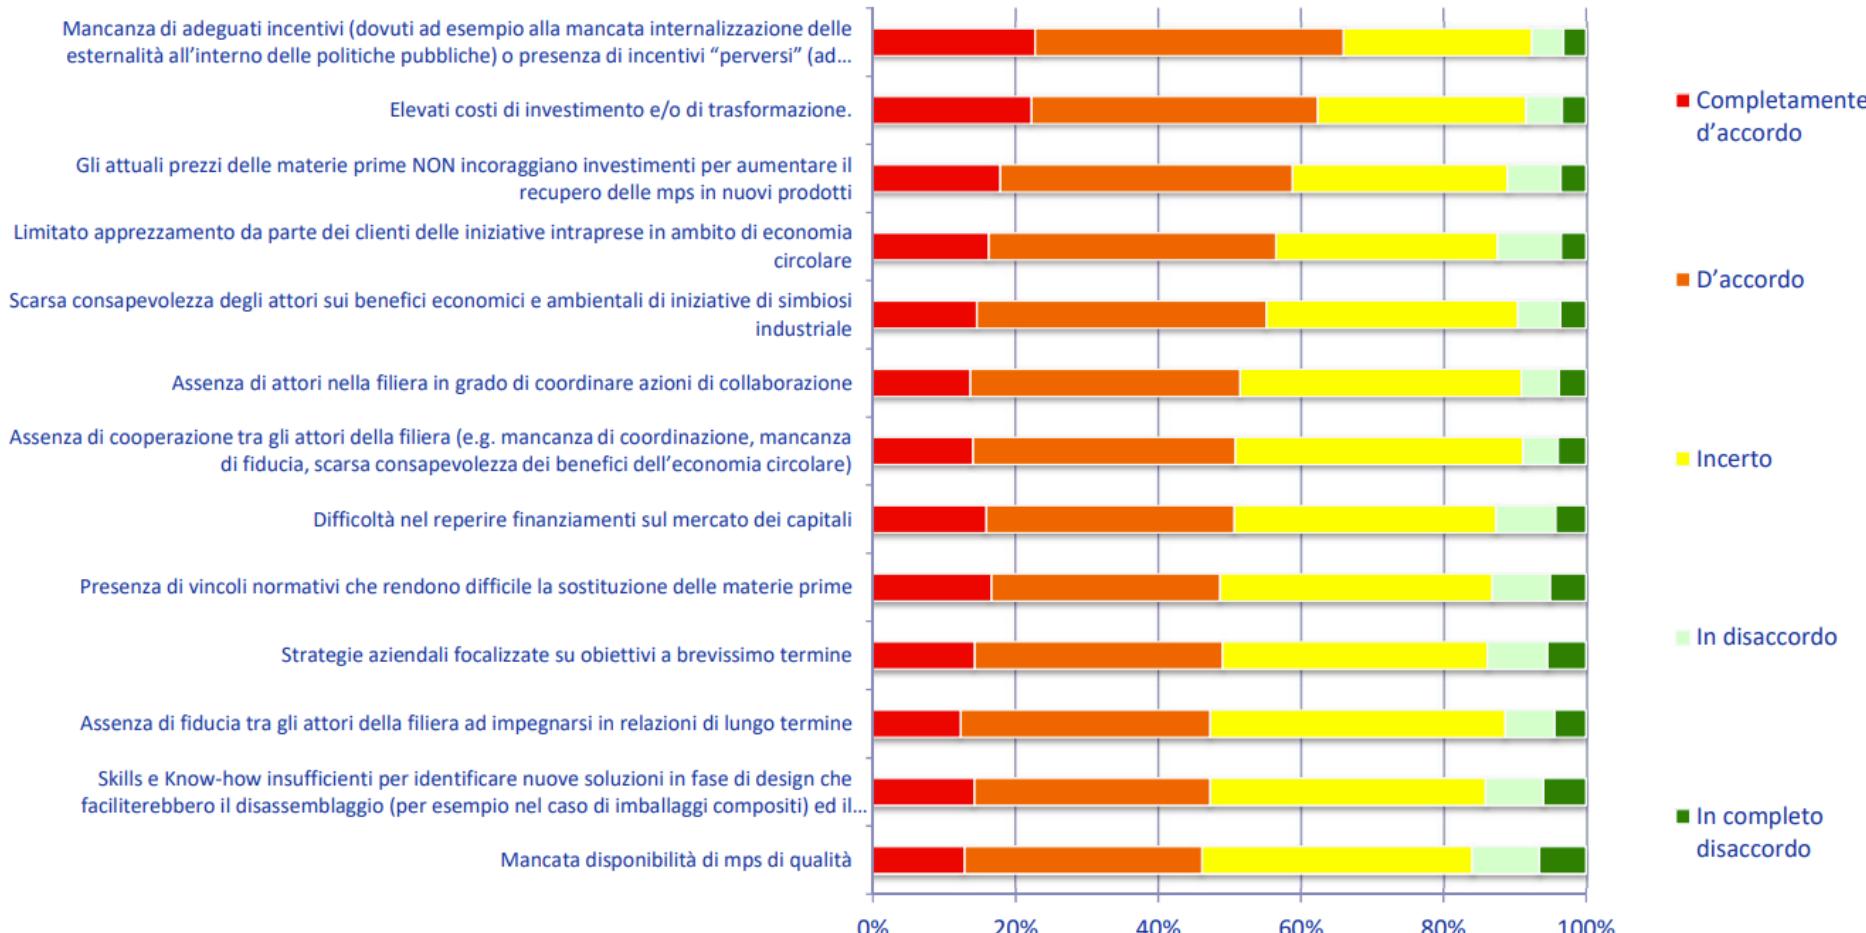

Prodotti 100%naturali Coloranti privi di sofisticazioni, additivi o contaminazioni chimiche

Non solo grandi aziende!

- 493 cases of CBMs implementation
 - 231 Large Enterprises
 - 199 Small-Medium Enterprises
 - 71 Ecosystems
 - 56 Supply Chains

Le principali barriere per le PMI

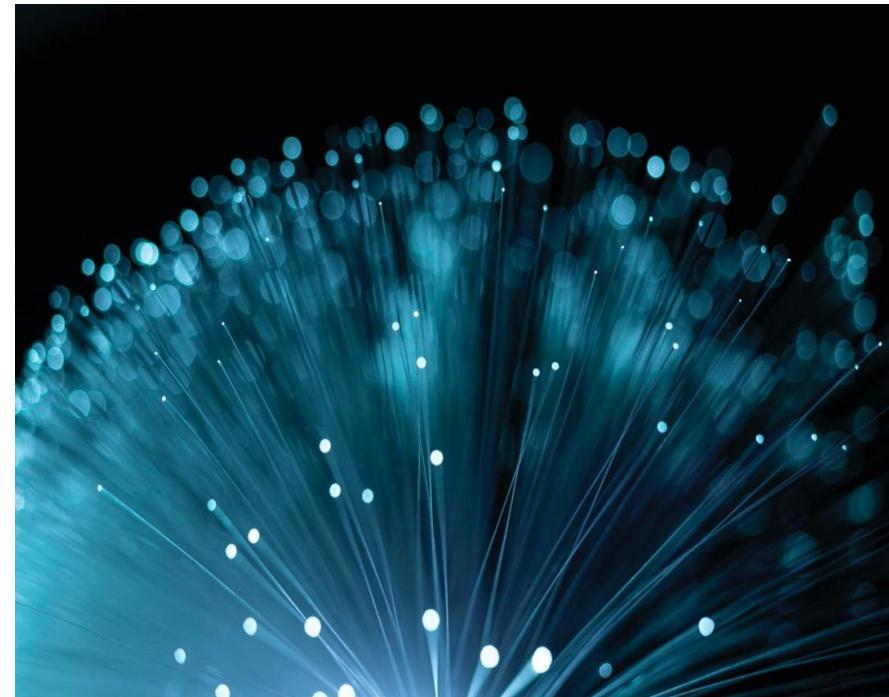

Fonte dati: CONAI – Consorzio Nazionale Imballaggi

Possibili soluzioni e strategie di mitigazione

- Adottare un approccio supply chain management
- Sviluppare fiducia e collaborazione tra gli stakeholder
- Creare una maggiore consapevolezza da parte dei consumatori
- Conoscere normative e regolamentazioni
- Sfruttare gli attuali strumenti finanziari e di incentivazione
- Quantificare i benefici sulle tre dimensioni
- Sviluppare una cultura per la circolarità
- Disporre di figure professionali formate

New and consumer-driven business models for resilient and circular supply chains

Ambition

To define a new competitive paradigm, by conceptualizing, designing, and experimenting with new archetypes, methods, and solutions of restorative and regenerative business models, resilient and circular supply chains, and innovative technology-based marketing strategies

Three main goals

01

To **think, design**, and effectively **implement** new restorative and regenerative **business models archetypes** (customer and resource centric), aimed at slowing, closing, and narrowing the resource cycles, **scalable** at different **levels** (i.e., companies, networks, ecosystems) and **sizes** (large and SMEs)

02

To design and manage highly complex **transformative and regenerative supply chains** characterized by **integrated** open-loops and closed-loop **flows, local and global** production networks, **digitally enabled**, aimed at improving **resilience** and **sustainable and circular orientation**

03

To conceive models and solutions to develop **branding, communication, customer engagement, and customer experience strategies**, by integrating the physical and virtual worlds and aimed at creating a new country of origin effect, based on circularity and sustainability

Our projects

P1

Cultural value chains:
From local traditional
production districts to
a new country of
origin effect (PoliBa)

P2

Resilience and
sustainability of global
value/supply chains and
re-shoring strategies
(PoliMi)

P3

Transformative Supply
Chains for Circular and
Resilient Transition of
Furniture Sector (PoliBa)

P4

Customer-based Marketing
Strategies for the
Sustainable and Circular
Made in Italy
(UniSapienza)

P5

RESTART - REsilient,
SusTainable and circulAr
leatheR and Textile supply
chains (UniFi)

P6

From Textile Waste to
Resource: Exploring
Industrial Symbiosis
Opportunities (PoliBa)

P7

Pay-per-x: developing
servitized business
models for circularity
in machinery sectors
(UniBg)

Grazie!
